

Best in KLAS Virtual Care with HRS and Caregility

Enabling Virtual Care Everywhere

HRS and Caregility provide a seamless, end-to-end virtual care platform that encompasses the entire healthcare journey—from prevention, to inpatient, to discharge into the patient’s home.

- ✓ Increase patient engagement
- ✓ Improve health outcomes
- ✓ Optimize care continuity
- ✓ Boost patient satisfaction
- ✓ Reduce cost of care
- ✓ Incorporate specialist care

Offering providers insight into the complete patient journey

- Software and video connectivity for any level of care or setting from facilities to the home
- Cloud-based clinical dashboard for monitoring patients’ symptoms and virtual visits
- Providing cross-platform, mobile and desktop compatibility, and interoperability with major EHRs and workflows

Streamlining the patient experience with a centralized telehealth platform

- Virtual visits, Bluetooth biometric monitoring, symptom surveys, and medication reminders
- Condition-specific education and teach back quizzes, plus wound imaging
- Mobile application for caregiver connection, engagement, and care plan involvement

24/7 tech support for all providers, patients, and caregivers

Support for 90+ conditions
