

Telehealth solutions for every patient.

PatientConnect® Suite

Hospitals + Health Systems

Physician + Group Practices

Payers + Payviders

Home Health Agencies

Hospice + Palliative Care

PATIENTCONNECT® COMPLETE

10" Samsung tablet, Bluetooth scale, pulse ox, BP monitor, thermometer, glucometer, EkoDuo, wearables, and more

Hospital-at-home solution that promotes patient independence and self symptom management, allows patients real-time connection (video, text, call) to care team and increases health literacy and patient engagement through condition-specific educational content and teach back quizzes.

PATIENTCONNECT® CORE

10" Samsung tablet, patients can utilize personal peripherals or select HRS peripherals

Tablet-only solution that promotes patient peace-of-mind, facilitates real-time connection between care team, caregiver and patient, and equips patients with educational content and teach back quizzes.

PATIENTCONNECT® MOBILE

Patient's personal device, available on iOS and Android, Bluetooth capability: pulse ox, BP monitor, thermometer, glucometer, scale

Bring Your Own Device (BYOD) solution that promotes patient engagement at scale across a range of populations through built in content, integrated medication reminders and peripherals to enable remote monitoring and clinical escalation.

PATIENTCONNECT® VOICE

Patient's personal device, landline or cellular

Interactive Voice Response (IVR) solution that promotes patient engagement and improves adherence through symptom surveys and custom medication, activity, and appointment reminders.
