# Integration with Epic via Context Aware Linking

## Caregility's Virtual Care Platform with Epic delivers a full end-to-end solution for improving your telehealth workflows

Caregility's integration with Epic via context aware linking delivers HIPAA compliant and secure video conference within various clinical workflows, delivering the immediate ability to access new telehealth features and functionality.

### Caregility + Epic Key Features

- No secondary app for patients to download — access video call with one click.
- Launch virtual sessions directly within Epic Hyperspace, Canto, Rover, MyChart, MyChart Bedside, EpicCare Link, and Haiku.
- Virtual Sessions launching over mobile devices will utilize Safari on Apple devices and Google Chrome on Android devices.
- Multi-participant virtual sessions that may include inviting interpreters, specialists, and family members to the session.
- Adhoc and On-Demand virtual sessions can be launched with patients that do not have a MyChart account or App.
- Uncapped session license capacity without blocking a virtual session from taking place. Ability to scale up or down capacity licensing, based on usage, providing a true pay for what you use flexible model.
- Inpatient Access Point of Care Systems (APS) offered in a variety of form factors including wall, tablet, or cart configurations for a variety of Epic inpatient workflows.
- Interoperability with standards-based video conferencing endpoints, Microsoft Skype for Business, SIP and WebRTC.
- HIPAA Compliant verified by PivotPoint Security.
- AES 128-bit encryption of all session data.
- Workflow expansions with the Caregility platform are available via flexible APIs.
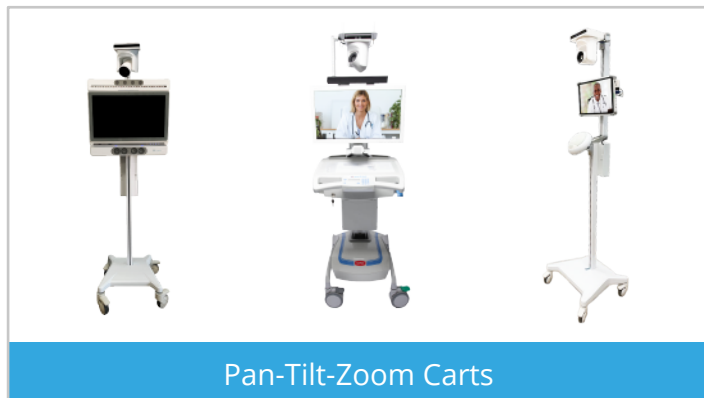

# Combine Caregility's Virtual Care Platform And Epic With Our Full Suite Of Systems
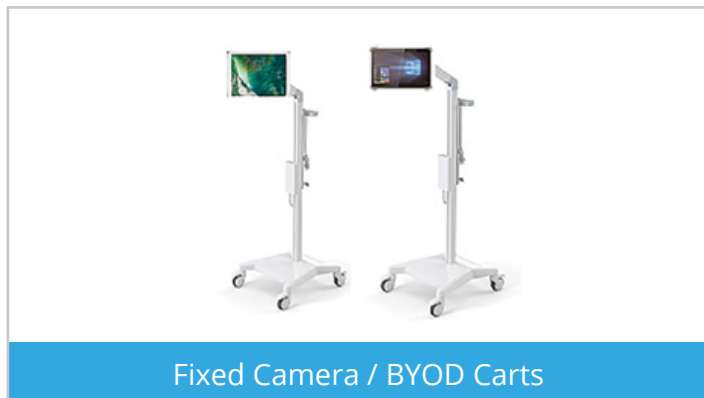

Attached to the telehealth platform are Caregility's Access Point of Care Systems which are video-enabled and located wherever patients or clinicians are: in hospitals, post-acute facilities, outpatient clinics or homes. Our telehealth devices come in different form factors ranging from wall-mounted, mobile/fixed carts to tablets allowing you to right-size your technology for the right environment and enable multiple clinical workflows at the same time.

**Wall-Mounted**
